### 1. Introduction

*P. R. Shukla, Subodh K. Sharma, P. Venkata Ramana and Sumana Bhattacharya*

1.1 Development priorities, the national planning process and sustainable development

1.2 National circumstances

1.3 Climate change and India's concerns

1.4 Chapter plan

### 2. Climate Change in India : Observations and Model Projections

*K. Rupa Kumar, K. Krishna Kumar, R. G. Ashrit, S. K. Patwardhan and G. B. Pant*

2.1 Introduction

2.2 The monsoons of India

2.3 Palaeoclimatic evidences of past climate over India

2.4 Instrumental records of Indian climate over the past century

2.4.1 Rainfall

2.4.2 Surface air temperature

2.4.3 Upper air-temperatures

2.4.4 Climatic trends over urban centres of India

2.4.5 Sea level

2.5 Extreme climatic events

2.5.1 Droughts and floods

2.5.2 Aridity

2.5.3 Short-duration rainfall extremes

2.5.4 Cyclonic storms

2.6 Simulations of climate over India

2.6.1 Validation of simulated climate over India

2.6.2 Sensitivity of the climate over India to transient increase in GHGs and sulphate aerosols

2.6.3 Future climatic scenarios for India under continued transient forcings

2.7 Weakening of ENSO-Monsoon relationships

2.8 Highlights

### 3. Climate Change and Greenhouse gas Inventories: Projections, Impacts and Mitigation Strategies

*A. P. Mitra and Sumana Bhattacharya*

3.1 Introduction

- 3.2 CO<sub>2</sub> equivalent concept: Global Warming Potential (GWP)
  - 3.3 Progress of inventorization of GHGs in India
  - 3.4 Evolution of different methodologies
  - 3.5 Strategies for refinement
  - 3.6 GHG inventory assessment
  - 3.7 Key issues
  - 3.8 Mitigation strategy
  - 3.9 Impacts of climate change
    - 3.9.1 Impacts on agriculture
    - 3.9.2 Impacts on water resources
    - 3.9.3 Impacts on coastal zones
    - 3.9.4 Impacts on human health
  - 3.10 Conclusion
4. Impacts of Climate Change on India and Her Efforts in Stabilization of Greenhouse Gases  
*J. R. Bhatt and Subodh K. Sharma*
- 4.1 Background
  - 4.2 What are the challenges that would arise for India due to climate change?
    - 4.2.1 Impact on agriculture
    - 4.2.2 Impact on forestry
    - 4.2.3 Impact on coastal zones
    - 4.2.4 Impact on mountains and glaciers
    - 4.2.5 Impact on rainfall and water resources
    - 4.2.6 Impact on natural ecosystems
    - 4.2.7 Impact on public health
    - 4.2.8 Impact on energy generation and use
    - 4.2.9 Impact on extreme events
    - 4.2.10 Impact on future multilateral negotiations
  - 4.3 What are the issues that would arise for various stakeholders in India ?
    - 4.3.1 Planned approach to environment and development
    - 4.3.2 The Institutional framework for energy efficiency and use of renewable energy
    - 4.3.3 Agricultural and rural development
    - 4.3.4 Health
    - 4.3.5 Environmental policy and law framework
    - 4.3.6 Prevention of adverse environmental impacts
    - 4.3.7 Waste minimization and pollution prevention
    - 4.3.8 Industry
    - 4.3.9 Energy
  - 4.4 Conclusion
5. Climate Change, Forests and India: CO<sub>2</sub> Emissions, Impacts, Mitigation and Global Negotiations  
*N. H. Ravindranath*
- 5.1 Introduction
  - 5.2 Area under forests and carbon stock
  - 5.3 Forest conversion

- 5.4 CO<sub>2</sub> emissions from land-use change and forestry sector
  - 5.5 Impact of climate change on forests
  - 5.6 Adaptation measures to cope with climate change impacts on forests
  - 5.7 Mitigation potential of the forestry sector
    - 5.7.1 Mitigation potential at the global Level
    - 5.7.2 Mitigation potential in India under technical potential and demand-driven scenarios
    - 5.7.3 Incremental mitigation potential under commercial forestry scenario in India
    - 5.7.4 Socio-economic and environmental benefits of forest sector mitigation activities
    - 5.7.5 Barriers to forestry sector mitigation activities and policy options
  - 5.8 Forestry sector and global negotiations
    - 5.8.1 Definition of forests
    - 5.8.2 Accounting, Measurement and Monitoring
  - 5.9 Carbon Sink and CDM: opportunities and implications for developing countries under FCCC and Kyoto Protocol
    - 5.9.1 Mitigation options and need for carbon sink conservation and expansion
    - 5.9.2 Technology Transfer and investment opportunities
  - 5.10 Contentious issues relevant to carbon sinks
6. Climate Change, Food Security and Sustainable Agriculture: Impacts and Adaptation Strategies
- M. S. Swaminathan*
- 6.1 Introduction
  - 6.2 Challenges ahead
  - 6.3 Implication of potential changes in climate
    - 6.3.1 Spatial impact
    - 6.3.2 Physiological impact
    - 6.3.3 Implications of sea-level rise
  - 6.4 Consolidating gains and adapting to change
    - 6.4.1 Improving consumption
    - 6.4.2 Improving production
    - 6.4.3 Adapting to change
  - 6.5 Monsoon management
  - 6.6 Community food and water security programme
    - 6.6.1 Design of project
    - 6.6.2 Launching a sustainable community food and water security system
  - 6.7 Conclusion
7. Integrating Climate Change and Sustainable Development. Issues, Opportunities and Strategies
- Jyoti K. Parikh and Kirit Parikh
- 7.1 Introduction
  - 7.2 Why should India be concerned about climate change?
    - 7.2.1 Risk of lower agricultural production
    - 7.2.2 Risk of sea level rise
    - 7.2.3 Risk of extreme events

- 7.2.4 The costs of changing energy strategy
  - 7.3 Issues in climate change
  - 7.4 Emission reduction responsibilities
  - 7.5 Discounting the future
  - 7.6 Delay is free riding
  - 7.7 An equitable solution: An ethical issue
  - 7.8 Mitigation costs and benefits
  - 7.9 Clean Development Mechanism – A step to equity or a sham?
    - 7.9.1 Baseline determination – perverse incentives
    - 7.9.2 Look before you leap – Sink projects through Clean Development Mechanism
    - 7.9.3 Technology transfer and Clean Development Mechanism
  - 7.10 Low hanging fruits and pricing of carbon
  - 7.11 Conclusions: Integrating climate change and sustainable development
8. Climate Change and Indian Industry: Challenges, Opportunities and Responses  
*V. Raghuraman*
- 8.1 Challenges
  - 8.2 Opportunities
    - 8.2.1 Power Generation
    - 8.2.2 Industry
    - 8.2.3 Transport
  - 8.3 Response
  - 8.4 Indian cement sector: Paving the way
  - 8.5 Conclusion
9. Renewable Energy Technologies: Mitigation Potential and Operational Strategies  
*P. R. Shukla, Amit Garg, Debyani Ghosh and P. Venkata Ramana*
- 9.1 Introduction
  - 9.2 Evolution of India's renewable energy program
    - 9.2.1 Small hydro power
    - 9.2.2 Wind power
    - 9.2.3 Biomass-based power generation/cogeneration
    - 9.2.4 Solar technologies
  - 9.3 Assessing mitigation potential
    - 9.3.1 Analytical framework
    - 9.3.2 Scenarios
  - 9.4 Results
    - 9.4.1 Technology Trajectories
    - 9.4.2 Renewable and carbon market linkages
    - 9.4.3 Marginal mitigation costs
    - 9.4.4 Clean Development Mechanism (CDM) potential estimation
    - 9.4.5 Investments in Renewable Energy Technologies (RETs)
  - 9.5 Barriers in renewable energy development and penetration
  - 9.6 Conclusions and operational strategies
    - 9.6.1 Small hydro
    - 9.6.2 Wind

- 9.6.3 Biomass and cogeneration
- 9.6.4 Solar

## 10. Development and Climate: the Road Ahead

*P. R. Shukla, Subodh K. Sharma, P. Venkata Ramana and Amit Garg*

### 10.1 Linking development priorities with climate change

- 10.1.1 Economic security
- 10.1.2 Energy security
- 10.1.3 Environmental security
- 10.1.4 Water security
- 10.1.5 Food security
- 10.1.6 Health security

### 10.2 Ongoing initiatives: India's Initial National Communication to UNFCCC

- 10.2.1 Project institutional arrangement
- 10.2.2 Inventory estimation (IE)
- 10.2.3 Uncertainty reduction (UR)
- 10.2.4 Vulnerability assessment and adaptation (V&A)

### 10.3 The road ahead

- 10.3.1 Targeted research (TR)
- 10.3.2 Systematic observation networks for GHG emissions
- 10.3.3 Improvement in GHG emission estimates in key sectors
- 10.3.4 Developing high resolution climate scenarios
- 10.3.5 Developing Indian scenarios
- 10.3.6 Integrated assessment
- 10.3.7 Data Center (DC) and website
- 10.3.8 Awareness generation through education and dissemination
- 10.3.9 Capacity building
- 10.3.10 Networking

### 10.4 Development and climate: the future
